

Free Standing Pools

You can now build the pool of your dreams in backyards that previously would have been deemed cost prohibited or impractical.

Our specially engineered pool shells allow you the flexibility to work with our expert pool builders to design a backyard that suits both your budget and lifestyle.

The Free Standing option provides a wonderful alternative to building large and often expensive retaining walls, by having your swimming pool raised out of the existing ground level, meaning the process is much quicker and often less expensive than the alternative.

Don't compromise your outdoor designer pool with an unsightly alternative. With a Free Standing Pool you can enjoy a seamless design which will provide you with a wonderful poolside lifestyle.
